CT33 Combination
Weighing and Track & Trace Solution

Maximum System Adaptability
Based on the flexible C-Series design, it can be adapted to any production and application need. A wide range of options for mechanical, product handling, software and controls are available in standard or customized additions to maximize process optimization.

Compact Design
The space-saving design is optimized for the carton size, desired throughput and maximum weight of the products. Integrating three inspections in one compact system maximizes production line space at only 1600 mm in length.

Weighing Technology and Approval
100% dynamic weight control supports compliance with weighing regulations by avoiding over-fill or carrying out completeness checks with exceptional accuracy at high throughputs.

Global Service Support
A global network of service experts provide fast remote and on-site support. Our comprehensive service offering supports regulatory compliance, high performance, and maximum uptime throughout the life cycle of your product inspection equipment.

Compact Weighing and Serialization

This powerful solution combines proven item serialization and visual inspection of the label with high precision weighing using FlashCell™ EMFR technology.

Maximum Productivity
Minimal manual operator intervention due to automated product handling and sorting options for increased productivity.
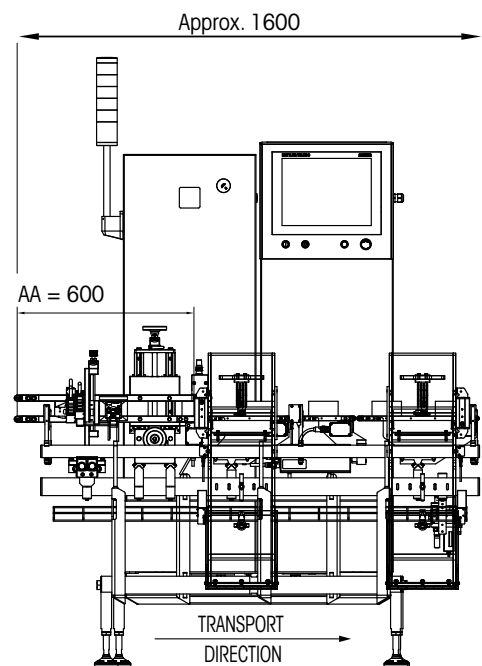

Exceptional Product Handling
The transversal adjustment and top-bottom-conveyor offer smooth product transfer and handling.

### Software and Control Excellence
Full integration of the checkweighing and serialization software on a single HMI for intuitive system operation.

CT33 Combination

CT33 Combination - front view - base configuration

CT33 Combination - side view - base configuration

Maximum Software Flexibility

- Multiple software options to support your business needs.
- Use PLM Direct for single production lines.
- Choose PLM with serialization modules pre-configured for convenience.

Simplified Cleaning

- The open frame architecture provides easy access for cleaning and maintenance, as well as retrieving products that have fallen off the production line.
- Easy conveyor belt changes and removable catch bins support fast cleaning.

Technical Details		CT33 Combination
Track & Trace Solution		Serialization
System Design		Automated
Product Types		Cartons, Oriented
Throughput		Up to 300 ppm
Reading Devices		Smart Camera 320
Number of Reading Devices		Up to 2
Dimensions (H x W x D)		2067 x 1580 x 1360 mm
HMI		15"
Transport Height		800 - 900 mm (± 30)
	Product Width	45 - 200 mm
	Product Length	25 - 200 mm
	Product Height	10 - 200 mm
Product Sorting		Yes
Compatible Software		PLM Serialization, PLM Direct
Weighing Technology		FlashCell™ EMFR Load Cell
Accuracy		from ±0.01 g

SYSTECH Service with global reach and tailored care solutions

Identify. Trace. Trust.
Traceability and serialization solutions to drive efficiency, achieve compliance and protect your brand.
